5. Description of goods, services, or construction:			
Currently HHSC has a primary Internet connection, provided by TW Telecom. Should this circuit go down, critical HHSC and EMR/HIS services and patient care will be negatively impacted. A second, redundant Internet connection with Hawaiian Telecom is required to provide the required connectivity. There are only two Internet providers in the state of Hawaii; TW Telecom and Hawaiian Telecom and a limited number of Internet access "re-sellers". HHSC already has TW Telecom as our primary Internet service provider and our requirement is to have a different service provider to meet our backup Internet requirements. The "re-seller" is also more expensive than contracting directly with Hawaiian Telecom. Hawaiian Telecom connects directly to our demark and avoids the "re-seller" handoff, latency and added complexity. A competitive procurement would not resolve the identified technological constraints that are inherent with access from "re-sellers" selling the same service HHSC can purchase directly from Hawaiian Telcom.			
6. Scope of work for the contract is revised as follows:			
No revision
