4. Obtains patient history and vital signs; documents into record. Takes temperature, pulse, respiration, blood pressure, height and weight; accurately record on appropriate forms in patient’s chart and report all abnormal readings or sudden changes to licensed personnel.

5. Assists licensed personnel with procedures and/or treatment, and other clinical activities; ensures the appropriate paperwork is signed by patient; the room is prepared with the appropriate equipment, supplies, and medications.

6. Collect and examine specimens and conduct point of care testing as needed. Label specimens appropriately, document within the EMR, and prepare for diagnostic send out to the laboratory. Report all abnormal results to licensed personnel.

7. Perform urinary catheterization via sterile technique and collect necessary specimens for evaluation.
8. Perform skin preparations for application of aseptic dressings; apply slings and ace bandages. Fit and instruct patients in the use of crutches; apply eye patches; and assist with casting.

9. Remove sutures and/or staples as directed by a licensed provider.

10. Apply oxygen via nasal cannula, simple mask and/or nebulizer mask, as directed by licensed personnel.

11. Set up and perform EKG monitoring or other cardiac monitoring systems.

12. Carry out cardiopulmonary resuscitation on patients in cardiac or respiratory arrest. Respond to emergency codes.

13. Provide patient specific education as directed by licensed personnel.

14. Trains new employees and acquaints them with their responsibilities, department and administrative policies, safety, fire and emergency procedures.

15. Answer phones, take messages, documents within the EMR using SBAR format, pass information to other staff, and generally assist with all duties of clinic as appropriate.

16. Respond politely to all patient requests and inquiries.

17. Communicate and interact with patients, families and co-workers in a positive, courteous, and respectful manner.

18. Adapts to changing clinic needs and supports clinic, hospital philosophy, goals and objectives.

19. Monitor and maintain environment of care safety checklist items, and daily/weekly equipment checks. Send completed lists to quality management department every month.

20. Inspect oxygen levels in tanks and replace as necessary. Ensure that reserve supply of tanks is available.

21. Adhere to safety/infection control policies and procedures. Report unsafe equipment, remove from use, communicate with responsible department according to policy, and assure follow-up.
22. Assures that all equipment necessary for provision of care is readily available and in working order to include cleaning, packing, autoclaving equipment as needed.

23. Maintain a clean, well-stocked, safe environment for patients and staff. Keep patient care and utility areas neat and organized.

24. Use the principles of growth and development of each patient’s age-specific needs and assists in providing age-specific treatment and care.

25. Uses the principles of pain management in assisting each patient to be as comfortable and pain free as possible.

26. Uses knowledge of different cultural specific needs of each patient in assisting in treatment and care.

27. Reports incidents and unusual occurrences according to department policies.

28. Maintain the strictest confidentiality of all facility and facility-related employee information.

29. Follows and maintains clinic practices and procedures within all applicable rules, policies, laws, regulations and accreditation requirements.

30. Participates in all departmental activities including, Joint Commission, Safety programs, Disaster Drills, Performance Improvement, Infection Control and any other requirements that are assigned or directed by management.

31. Maintains competencies through continuing education and credentialing, inservices and/or unit/hospital competencies within appropriate time frame.

Other Duties

In addition to the key duties and responsibilities, this position may be assigned to:

Schedules and confirms appointments, process referrals, contacts patients for follow-up and/or instructions; obtain insurance pre-authorization prior to performing a procedure, scheduling a diagnostic study, and processing non-covered medications or treatments; understands billing procedures and obtains all necessary information to ensure bills are paid in a timely and accurate manner; remains current with changes in insurance plan guidelines or regulations, and
