

HAWAII HEALTH SYSTEMS CORPORATION

Job Description

Sterile Processing Aide

(Job Description, Class Specification & Minimum Qualification Requirements)

Entry	HE-02	6.849
Full Performance	HE-04	6.850

Function and Location

This position works in the Surgical Services Sterile Processing Unit of a hospital or clinic and provides support to the surgery crew. Is responsible for receiving, cleaning, and separating instruments used in surgical cases, assisting the Sterile Processing Technicians with various decontamination and sterilization duties, and follows safety/infection control policies and procedures. May be required to work on shifts, including evenings and weekends, and holidays.

Key Duties and Responsibilities

1. Receive and record contaminated instruments, equipment and supplies for sorting and decontamination using proper PPE and procedures per manufacture IFU or evidence base practices.
2. Manually clean instruments and equipment of contaminants, removing debris.
3. Assists the Sterile Processing Technicians with decontaminating instruments by soaking, autoclaving or loading into the washer/disinfector.
4. Visually inspect instruments for damage, imperfection, debris, alignment of jaws and joints; sharpness or worn spots that would deem instruments unacceptable. Reassemble instruments into sets and place instruments into containers or individually wrap instruments for sterilization.
5. Assist the Sterile Processing Technicians with flash autoclave or chemically sterilize instruments according to manufacturer's recommendations, which are required immediately for another surgery.
6. Assemble or peel pack all instrument procedure trays per instrument count sheets. Receive and put sterilized instruments back into sterile instrument carts or cabinets.
7. Adhere to safety/infection control policies and procedures. Report unsafe equipment.
8. Maintains the biological control records of each load sterilized.
